

### Risk Management: Training Is No Accident

Date: \_\_\_\_\_

Student: \_\_\_\_\_

Dept: \_\_\_\_\_

Station: \_\_\_\_\_

Training Code: \_\_\_\_\_

#### NOTES:

#### CHALLENGE

Training is an essential component of the firefighter's skill development. It is also during training that we impart fundamental safety attitudes. Not surprisingly, these activities can also be the source of injuries to firefighters.

Training is very important to the development of professional firefighters. It should be both effective and safe for its participants. We should always evaluate and analyze any training related incidents.

#### DISCUSSION

- What types of accidents have occurred during training in our department?
- Do the same types of accidents occur repeatedly?
- What types of accident investigations occur when training accidents happen?
- Are these accidents forwarded to the safety committee?
- How do we address corrective actions?
- How effective is our system for making corrective action?

**The greatest asset of the fire service is our people; protect them!**
